Let's Talk Power: Keeping Your Farm Running When the Grid Can't

Hey there. If you're reading this, you're probably looking at your energy bills or your irrigation schedule and thinking, "There has to be a better way." Honestly, I don't blame you. Over the last two decades, I've been on site from California's Central Valley to the wheat fields of Germany, and the story is often the same: farming is an energy-intensive business, and the grid isn't always the reliable partner you need it to be.

That's where big battery systems C specifically, 5-megawatt-hour (MWh) utility-scale Battery Energy Storage Systems (BESS) C are changing the game. But not all batteries are created equal. The new kid on the block, grid-forming technology
